

ASSIGNMENT:

Github Link : <https://github.com/robin2616/Movie-mania>

Deployed Project Link : <https://movie-mania-24.vercel.app/>

About Project :

- I had made this project using ReactJs ,Tailwind CSS , API Fetching.
- It include searching option , by which user can search their desired movie (please search a valid name otherwise site does not load)
- I had used useContext Hook for sharing data from one page to another
- I had used Tailwind CSS to make website more attractive.
